# **SUMMARY**

Software Test Engineer having around 2 years of experience in manual and automation testing in an agile Environment. Having hands-on experience in executing test cases, test scripts and defect tracking. Strong analytical and collaborative skills, ensuring the delivery of high-quality software. Seeking opportunities to contribute to dynamic teams and enhance product quality.

# **SKILLS**

- Manual Testing (Web, Mobile)
- Automation Testing (Web)
- API Testing, Postman
- Selenium WebDriver, TestNG Framework, Maven
- Java, JIRA, Debugging
- SDLC, STLC, JSON, XML

- Appium, Jenkins
- Salesforce Commerce Cloud (SFCC)
- **Requirement Analysis**
- Communication
- Attention to detail
- **Problem-Solving**

# **WORK EXPERIENCE**

#### **QA** Engineer

Hudson's Bay Company (HBC) | Bengaluru

Apr 2022 - Jul 2023

- Developed and executed end-to-end test scenarios for web applications and mobile app, resulting in 30% faster time-to-market for new features and enhancements. Automated regression tests, saving the team 15+ hours per week and improving overall testing efficiency by 40%. Implemented and executed automated test scripts using Selenium with TestNG framework.
- Collaborated closely with development teams to understand API specifications and ensure effective testing coverage.
- Utilized the Postman tool for API documentation and testing purposes.
- Participated in daily stand-up meetings to discuss progress on projects and tasks assigned.
- Implemented User Acceptance Testing process, creating and executing test cases based on user stories; achieved a 95% defect detection rate and improved overall software quality.

#### **PROJECT:** The Bay & Zellers

- Successfully automated 48% of test cases, resulting in a reduction in a 35% of testing time.
- Identified and resolved 26 critical bugs before release, preventing potential revenue loss and reputational damage.
- Designed and implemented responsive and visually appealing content slots for the web applications by utilizing the SFCC platform to showcase products and promotions effectively.

### **Associate Software Test Engineer**

**Test Yantra Software Solution | Bengaluru** 

Dec 2021 - Mar 2022

- Authored comprehensive manual test cases for a web application, ensuring thorough test coverage and alignment with project requirements.
- Conducted exploratory testing to uncover potential issues not covered by predefined test cases, enhancing overall product reliability.
- Utilized Jira for end-to-end bug tracking, maintaining an organized and transparent record of identified issues.
- Contributed to a collaborative and agile work environment, promoting knowledge sharing and continuous improvement in testing processes.

#### **PROJECT:** Fireflink

- It is an AI-Powered Script less Software Test Automation tool, which uses AI-based NLP techniques to create stable, reliable, and cut-above-automated test scripts.
- Diligently conducted test case evaluations, defect identification, and resolution processes to uphold software integrity and user experience standards within the Fireflink platform.
- Contributed to refining Fireflink's automated testing capabilities based on manual testing insights.
